Foreword

Firstly, a big thank you for signing up to receive the Place Bet Profits betting system.

The system involves a straightforward set of rules to run through, and with a little practise should take no more than 15 - 20 minutes to find a day's bets.

Place Bet Profits has produced substantial profits since 2011, and has been proven through independent trials by trusted websites including More Money Review and Geegeez.

I'm sure it will prove to be a great addition to your betting portfolio, just as it has been to my own.

System Overview

This system focuses on UK racing, and as the name suggests we will be specifically betting horses to place only. The main aim is to produce a high strike rate from our bets in order to secure steady and consistent profits.

Place Bet Profits was created in 2011, and since then we have seen the following results:

Bets: 1506 Wins: 1118

74.24% Strike Rate

Longest winning run: 26 Longest losing run: 5

Starting with a £500 bankroll, and using our advised staking method, the system has produced a £16,702.02 profit to date.

This equates to an average profit of £4,773.43 per year.

While profit levels will be smaller at the outset when our bankroll is small, as it grows over time we are able to compound and increase our stakes, allowing much greater earnings over the long term.

2

System Rules

As with any horse racing system, we have a set of rules to follow in order to find our selections.

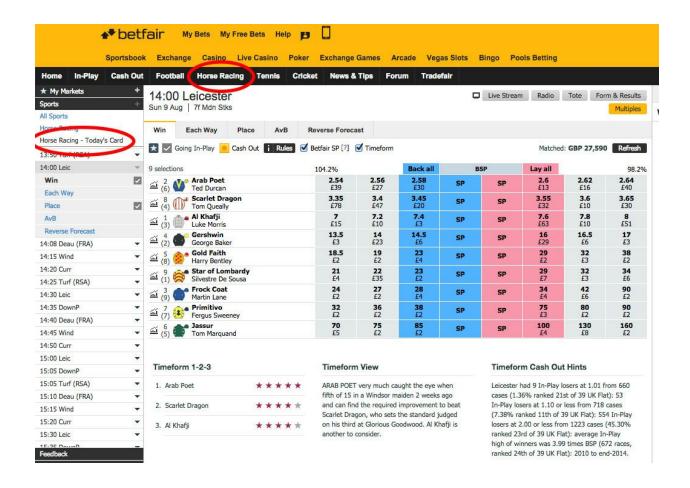

I've listed the system rules below, and then in the following pages will go into more detail on the reasoning behind these rules, and how to apply them:

- 1. There are less than 15 declared runners in the race
- 2. Our horse is a clear favourite
- 3. Our horse is running within 30 days of it's last race
- 4. Our horse ran well in it's last race
- 5. The going is similar to our horse's last run
- 6. Race distance is within 2 furlongs of last run

Now I'll show you the easiest order and how to apply these rules. Firstly, we'll need to load up two websites, which are:

Betfair Exchange - http://betfair.com/exchange

This is the best starting point for us, as we can run through each of the day's races by going to the 'Horse Racing' tab, then clicking on 'Horse Racing - Today's Card' on the left drop-down menu.

Racing Post - http://racingpost.com/cards

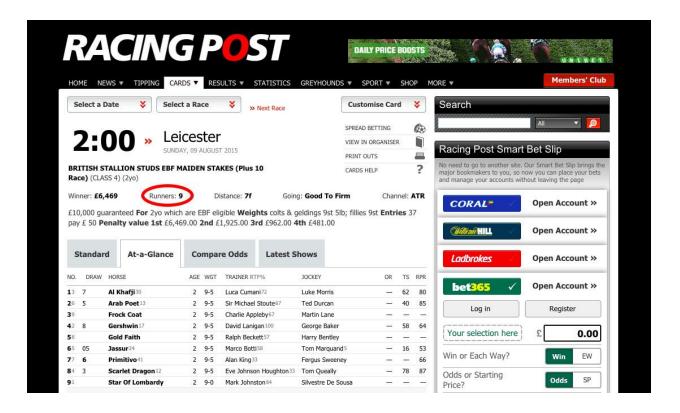

This is where we will get the more specific information needed that isn't available on Betfair.

Rule 1. There are less than 15 declared runners in the race

Declared runners means the amount of horses running in a race, before any withdrawals.

This rule can be applied simply by going through each UK race that day on Betfair, and counting the number of horses including non-runners.

Alternatively, this can also be viewed in the Racing Post card:

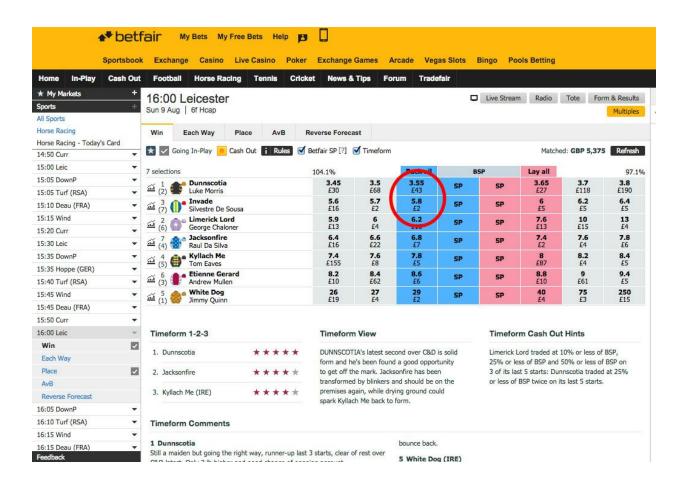

Rule 2. Our horse is a clear favourite

We are focusing on favourites to ensure a high strike rate and reduce the length of losing runs. This rule comprises of two parts:

- 1. Our horse must have odds of less than 4.0
- 2. There must be an odds gap of 2.0 between our horse and the second favourite.

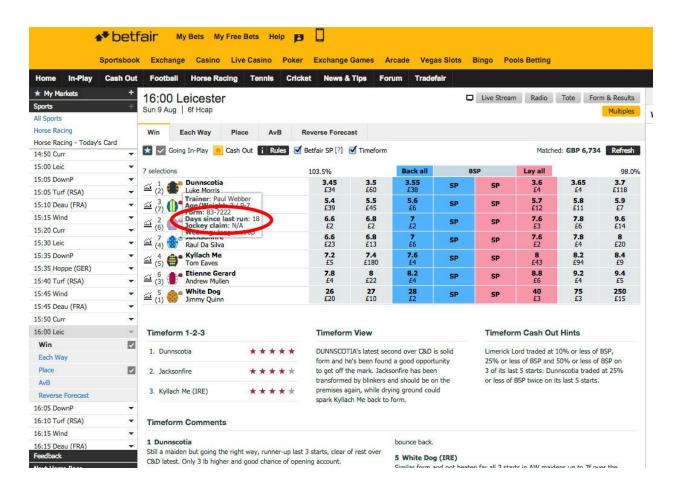

Since no horses in the 2.00 Leicester race qualify for this rule, we simply run through the day's races until we find a qualifier:

Rule 3. Our horse is running within 30 days of it's last race

Horse's that race after a long absence tend to underperform compared to those that have raced recently. Although trainers do their best to get a horse 'race fit' after a long absence, there's nothing quite like live races for improving performance.

To check how long ago a horse ran, hover the pointer over said horse in the Betfair market, and a popup will appear with further details:

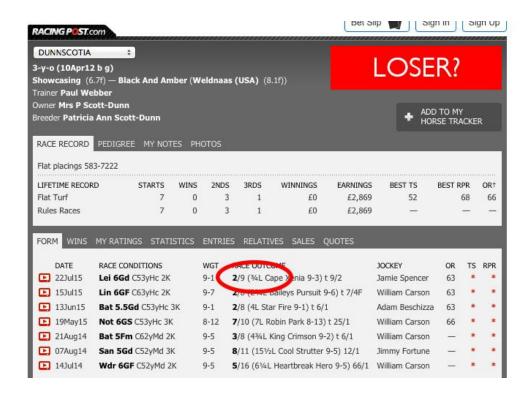

With 18 days since it's last run, Dunnscotia passes this rule.

Rule 4. Our horse ran well in it's last race

It's important that our horse has good recent form for it to be likely to run well. This rule may seem vague at first glance, so let's get to the specifics.

Looking at our horse's last race, we need a finish within ½ length of the winner for each 1 furlong the race is long. For example, Dunnscotia's last race was 6 furlongs, so we require it either to have won this race or to have finished within 3 lengths of the winner.

Go to the Racing Post post card, and click on the relevant horse. This will bring up a pop-up window like the one below, which shows a list of our horse's previous races in the 'form' tab.

At the top of this list we can see Dunnscotia's last race, and in the highlighted area we are shown firstly it's position, followed in brackets by the finishing distance behind the winner.

As we can see, our horse came second from nine runners and finished just $\frac{3}{4}$ of a length behind the winner, meaning it's passed this rule.

Rule 5. The going is similar to our horse's last run

The vast majority of horses run better or worse depending on the ground conditions, and many have a specific going which they perform the best on. To ensure our horse performs to the best of it's ability, we want it to be running on ground similar to that it's ran well on previously.

The different categories of going and their abbreviations are listed below:

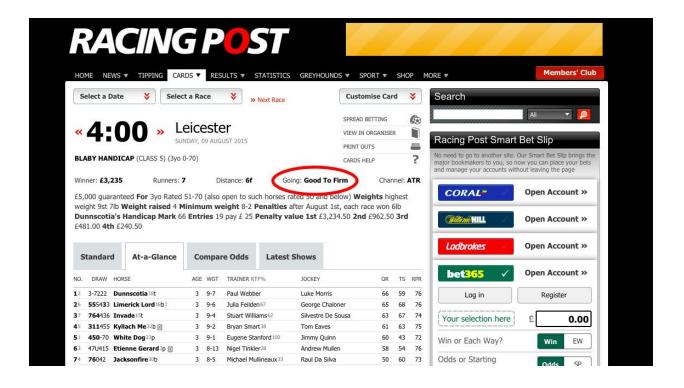

Turf
Firm (Fm)
Good to Firm (GF)
Good (Gd)
Good to Soft (GS)
Soft (Sft)
Heavy (Hy)

All Weather
Standard (St)
Fast (Fst)
Slow (Slw)

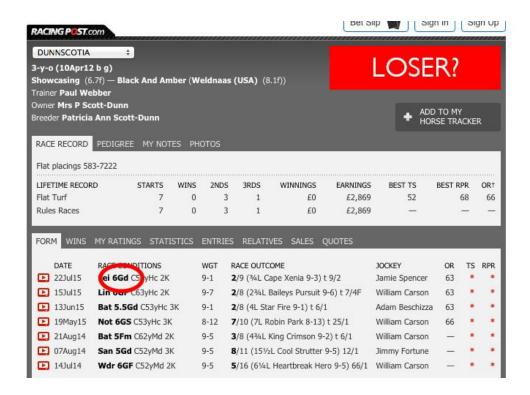

To pass this rule, our horse must be running within 1 category of going to it's last run. For example, if our current race is on firm ground, our horse's last run must have been on either firm or good to firm. If our current race is on good ground, our horse's last race must have been on good, good to firm or good to soft ground.

If our horse is running on an all weather surface (standard, fast or slow), it's last race can also have been on any all weather surface. Horses that are moving from turf to all weather, or vice versa, will not pass this rule.

On the Racing Post card, we firstly find the going for the current race:

Then, on the same pop-up window we used for the previous rule, we find the going of the previous race:

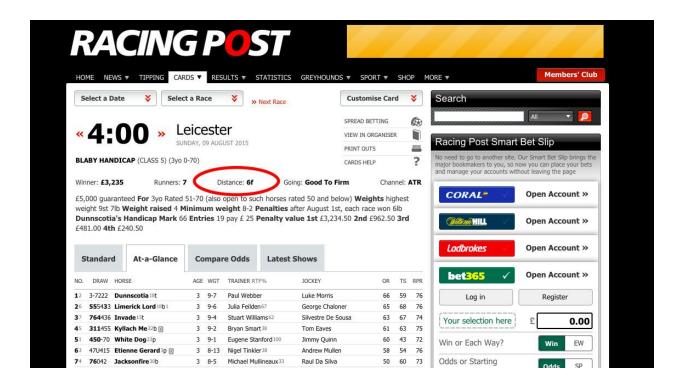

The going is displayed in abbreviation form, in the highlighted area after the race distance.

Dunnscotia is moving from good ground last time out, to good to firm ground. This is a change of 1 category, and so it passes this rule.

6. Race distance is within 2 furlongs of last run

Similarly to the reasoning behind rule 5, we want our horse to have proven form over a race distance similar to it's current run.

We already know the distance of Dunnscotia's last race from the previous screenshot - 6 furlongs. We find the distance of the current race on the Racing Post card:

The current race is also 6 furlongs, meaning Dunnscotia has passed all six system rules and therefore qualifies as a bet.

Placing your Bets

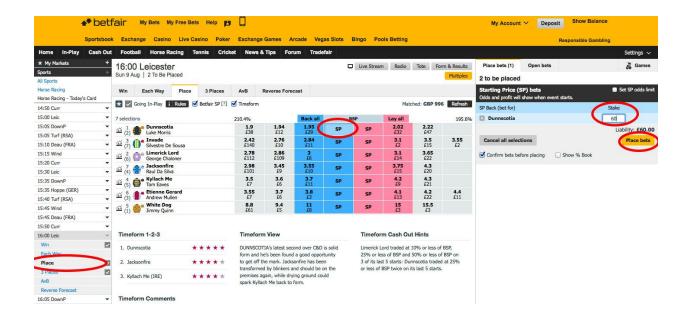

Now all we need to do is find our stake, and place our bet. Go back to the relevant race on Betfair, and choose the 'place' market in the drop-down menu on the left.

There are two recommended staking methods to use with this system:

6% stake - This is a simple method, designed to be used when betting at Betfair start price. To find our stake, simply multiply our bankroll by 0.06. For example with a £1000 bankroll -

Stake = £1000 x 0.06 = £60

Click the blue 'SP' button next to our horse, enter our stake and click 'place bets', as below:

We then compound our bankroll daily, by performing this calculation using where our bankroll currently stands at the beginning of each day. This allows our profits to increase as our bankroll increases.

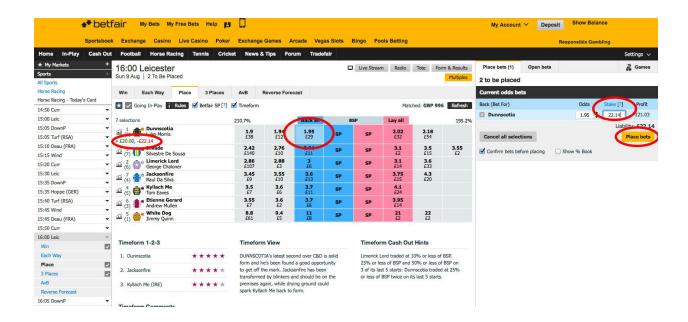

2% gain - A little more complicated, designed to be used when taking the current available price. This method has shown the greatest overall profit levels.

With this staking plan, we are aiming to increase our bankroll by 2% each bet. To find our target profit, divide your bankroll by 50. Then to find our stake divide by the (current available odds - 1). Finally, we take Betfair's 5% commission into account by dividing again by .95. For example with a £1000 bankroll, and current available odds of 1.95:

Target profit = £1000 / 50 = £20

Stake = £20 / .95 / .95 = £22.16

You can also find your stake by entering different stake amounts into Betfair, until the green number underneath our horse's name matches our target profit, as below:

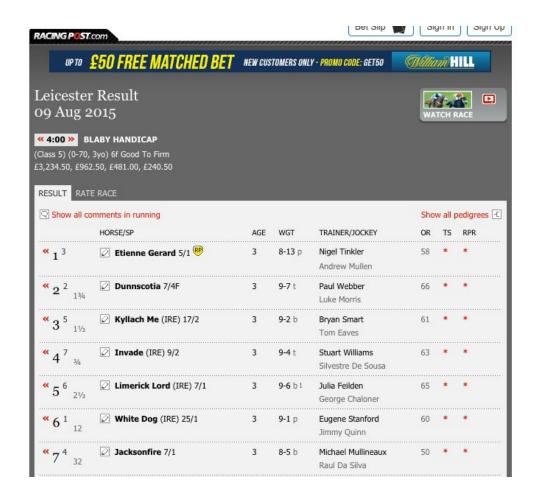

Your stake may vary slightly depending on your level of Betfair commission (this starts at 5% and decreases the more you use the exchange).

As with the 6% stake plan, we compound our bankroll daily in order to maximize profits.

The Result

All that's left to do now is watch the race, or check back after it's finished to see how our horse performed:

Dunnscotia finished a very respectable second, meaning our place bet was successful.

Conclusion

With a strike rate of almost 75%, Place Bet Profits has an average of 3 winning bets in 4, so for the majority of betting days we do come out with a profit.

Although the advised staking methods are fairly aggressive, the fewer number of losing bets and shorter losing runs ensure our bankroll is fully protected from loss.

I've included the results history from late 2011 - mid 2015, which is based on using the recommended 2% gain staking plan with daily compounding. The history is an accurate reflection of the systems performance, however in practise I would advise against continually growing your bankroll until the bet amounts become extremely large.

Instead, I'd recommend firstly building your bankroll up to a suitable level, then starting to withdraw profits intermittently to use as a supplemental income, or for the things you enjoy most in life.

Thanks for taking the time to read this system guide - Place Bet Profits is a great method of producing substantial earnings from betting over the long term, and I hope you find it useful.

All the best, Michael
